

Executive Summary

A Business Email Compromise (BEC) incident was investigated involving the Microsoft 365 account of Natasha Romanenko. Audit logs identified successful logins from Switzerland, despite the user residing in Melbourne and having no history of overseas travel or VPN usage. Following authentication, the threat actor accessed SharePoint resources, viewed and downloaded files, and used the compromised mailbox to facilitate a fraudulent payment request sent to ACME Pty Ltd.

Scope

- User: Natasha Romanenko
- Environment: Microsoft 365
- Evidence (Signin Logs, Message Trace, Mailbox PST):

Findings:

Time	Activity
08:46	Malicious login
08:48	SharePoint browsing
08:48	Files accessed
08:48	Files downloaded
Later	Fraudulent payment request sent
After discovery	Account remediated

Initial Access

Normal login:

49.185.122.38

Australia

First unauthorized login observed on 8 June 2026 from Swiss IP addresses:

85.204.124.83

85.204.124.84

85.204.124.85

85.204.124.86

Threat Activity

- Successful authentication.
- SharePoint browsing.
- File access.
- File downloads.
- Mailbox compromise.
- Fraudulent payment request.

Data Exposure

Audit records containing FileDownloaded indicate that corporate files were downloaded, suggesting likely data exfiltration.

Business Impact

- Potential financial fraud.
- Exposure of sensitive business information.
- Reputational risk.
- Third-party compromise.

Root Cause

The investigation indicates compromise of valid Microsoft 365 credentials. While the exact acquisition method cannot be proven from the available evidence, phishing or credential theft is a plausible explanation and should be treated as a hypothesis rather than a confirmed finding.

Recommendations

- Reset credentials and revoke active sessions.
- Enforce phishing-resistant MFA.
- Review mailbox rules and delegated access.
- Notify affected third parties.
- Perform a wider threat hunt for related indicators.
- Monitor for further suspicious sign-in activity.
- Review downloaded files for sensitivity and disclosure obligations.

The screenshot displays the Microsoft Azure portal interface. The top navigation bar shows the 'Microsoft Azure' logo and a search bar. The main content area is titled 'Users' and features a user profile for 'Natasha Romanenko'. The profile card includes a search bar, action buttons (Edit properties, Delete, Refresh, Reset password, Revoke sessions, Manage view, Got feedback?), and tabs for Overview, Monitoring, and Properties. The 'Overview' tab is active, showing 'Basic info' for the user. The user's name is 'Natasha Romanenko' with a profile picture showing the initials 'NR'. Below the name, the email address 'natasha.romanenko@wdlabs.com.au' and the role 'Member' are listed. A table of user details follows:

User principal name	natasha.romanenko@wdlabs.com.au	Group memberships	1
Object ID	d669c084-288d-4795-8536-3c4ba0d23e40	Applications	0
Created date time	May 23, 2020, 1:54 PM	Assigned roles	0
User type	Member	Assigned licenses	5
Identities	wdlabsoutlook.onmicrosoft.com		

Below the table, the 'My Feed' section shows two items: 'Account status' (Enabled) and 'B2B invitation' (Convert to external user). The left sidebar contains a navigation menu with options like Audit logs, Sign-in logs, Diagnose and solve problems, Custom security attributes, Assigned roles, Administrative units, Groups, Applications, Licenses, Devices, Azure role assignments, Authentication methods, and New support request.
